PROFESSIONAL SUMMARY

Java Developer skilled in building backend services and full-stack applications with Java, Spring Boot, REST APIs, and MySQL. Experienced in secure API design and React.js frontend integration. Hands-on with Docker and Jenkins for containerized, CI/CD-driven deployments. Seeking a Java Full Stack Developer role to build scalable, production-ready systems.

TECHNICAL SKILLS

Programming Language: Java

Core Concepts: Object-Oriented Programming (OOP)

Backend: Spring Boot, REST APIs, JDBC, JWT Authentication, Role-Based Access Control

Database: MySQL, SQL

Frontend: React.js, JavaScript, HTML5, CSS3

Tools & DevOps: Git, GitHub, Maven, Docker, Jenkins, CI/CD

INTERNSHIP EXPERIENCE

Full Stack Java Development Intern — TAP Academy

May 2026 – Present

- Develop full-stack Java applications using Spring Boot, MySQL, and REST APIs, covering backend logic and integration with frontend components.
- Collaborate on backend services and coordinate code changes through Git-based version control and structured deployment workflows.
- Containerize applications with Docker and automate build and release pipelines using Jenkins CI/CD.

Full Stack Developer Intern – Java — Gradtwin Service Private Limited

Mar 2026 – May 2026

- Developed backend modules in Java by applying OOP principles to write modular, maintainable code.
- Implemented database connectivity between backend services and MySQL using JDBC for reliable data persistence and retrieval.
- Configured Maven for build automation and dependency management across multiple Java modules.

Web Development Intern — Technohacks Edutech

Aug 2023 – Sep 2023

- Developed responsive web pages using HTML, CSS, and JavaScript with attention to cross-browser layout consistency.
- Debugged frontend code using structured debugging techniques and tracked changes with Git version control.
- Implemented interactive JavaScript features to improve page usability.

PROJECTS

Multimodal Civic Issue Intelligence for Predictive Urban Service Insights

Mar 2026 – May 2026

- Developed a full-stack civic issue management platform using Java, Spring Boot, and MySQL to let citizens report and track civic complaints.
- Implemented JWT-based authentication and role-based access control to secure user and admin functionality.
- Integrated AI-driven complaint classification and duplicate-complaint detection, with real-time complaint status tracking.
- Designed and exposed secure REST APIs, built responsive UI screens, and containerized the application using Docker for deployment.

Real-Time Smart Ambulance Emergency Response System

Jan 2026 – Mar 2026

- Built a real-time emergency response platform using Java, Spring Boot, MySQL, and the Google Maps API for ambulance dispatch and coordination.
- Designed REST APIs for live ambulance tracking, route management, and emergency request handling, backed by secure authentication.
- Optimized backend processing to support real-time location updates, improving responsiveness of emergency operations.

ACHIEVEMENTS

- Earned the Oracle Cloud Infrastructure 2026 AI Foundations Associate certification.
- Earned a Top 5 position among SIH Hackathon teams by developing and presenting a user-focused prototype to address a real-world problem (2023).
- Recognized for valuable contribution at the Infosys TECHZOOKA & PALS Hackathon, MCity (September 2025).

EDUCATION

B.Tech, Information Technology — Dhirajlal Gandhi College of Technology, Salem	2022 – 2026	CGPA: 8.22
HSC — Shri Swamy Matriculation Higher Secondary School, Salem	2021 – 2022	Percentage: 70.02%
SSLC — Shri Swamy Matriculation Higher Secondary School, Salem	2019 – 2020	Percentage: 98%
